

Unstoppable Power for the JCB Teletruk 66-40E

Engineered for Reliability and Performance Where It Matters Most

Your operations can't afford downtime. You need equipment that withstands the harshest elements—from driving rain and extreme temperatures to high-pressure washdowns—without compromising on performance or safety. Standard power solutions often fall short, leading to costly delays, operator strain, and integration headaches.

We designed our rugged outdoor power system to solve these challenges. It delivers relentless power and seamless integration, keeping your fleet moving and your productivity high. This is the durable, intelligent solution built to thrive in your demanding world.

- **Built for the Outdoors:** A fully sealed, IP69K-rated design provides ultimate protection against dust, water, and high-pressure cleaning. This ensures your equipment runs reliably through any weather or environment.
- **Flexible, All-Day Power:** Choose the power you need to match your workload. With high-capacity options, you can complete a full day of demanding tasks on a single charge, boosting efficiency.
- **Seamless Truck Integration:** Our system integrates directly the Teletruk's existing framework. This optimizes operational safety, enhances stability, and ensures all components work together flawlessly.
- **Effortless Charging:** A separate, ergonomic charge connector simplifies the connection process. This reduces physical effort for your operators, making daily routines faster and safer.

Model Options:

FBP-1731

- **Voltage:** 83.2V
- **Capacity:** 525Ah (44kW)
- **Ideal for** standard full-day operations requiring consistent, reliable power.

FBP-1752

- **Voltage:** 83.2V
- **Capacity:** 630Ah (52kW)
- **Engineered for** extended shifts and the most demanding applications, providing maximum runtime.

ABOUT GREEN CUBES TECHNOLOGY

Green Cubes Technology develops and manufactures a complete portfolio of lithium power systems that enable our OEM and enterprise customers to transition from Lead Acid and Internal Combustion Engine (ICE) power to Lithium-ion battery power. We utilize proven hardware and software platforms to build the most reliable lithium battery systems in our industries. With over 300 employees across six countries, Green Cubes has been producing reliable, high performance and high quality products for over 30 years.
