

## Revolutionize Your Operations with Li-Ion Battery Flexible Charging Solutions

### Flexible Charging - On-Board Charger or External Charger

Our built-in system eliminates the need for separate chargers, reducing the risks of damage, loss, or power mismatch from rotating locations.

- Fast Charging with High Efficiency
- Fully charges from 20% SOC in under 5 hours to keep your fleet moving
- Versatile Onboard J1772 Charge Port, low cost cord available online
- Connects to both 120 and 220 VAC power outlets, giving you flexibility at any location
- Compatible with standard wall outlets for user convenience

### Why Choose Our Battery Solution?

By integrating the charger directly into the battery, we eliminate the complexities often associated with external infrastructure, enabling a seamless charging experience tailored for rental truck operations. With one integrated solution, managing your battery system is easier than ever.

Contact us for a demo or more details. Let's power your fleet with smart, powerful, and easy-to-manage solutions.

## Advantages:

### Durable and Dependable

Fewer damaged connectors and reduced maintenance costs

### Reliability and Efficiency

Designed to reduce downtime and ensure your equipment keeps moving

### Streamlined Asset Management

With one integrated solution, managing your battery system is easier than ever
